ReactJS 101 with Terrell

Create demo App.

1. Open Terminal and type: the following:

    - npx create-react-app r1

    - cd r1

    - npm start

2. Open Browser and goto http://localhost:3000

Edit App

Using Visual Studio Code, Open File App.js in the r1 directory named src

Remove guts of DIV section and add a simple H1 with your name.

Save Code and See Browser window updated with changes in real time.

Upload Code to GitHub Repository

In Terminal Window hit <CTRL-C> to stop program

in the r1 directory type the following:

- git init

- git add .

- git commit

- enter the letters i and then k and exit VI with <ESC> wq

- git remote add origin *remote repository URL*

- git push

Setup Heroku

- Connect Heroku to GitHub

- Deploy App Test on URL: https://react-r1.herokuapp.com/
